Disclaimer: *This presentation has
been generated using AI-Tools*

What is a separation scientist acolyte?

An **acolyte** refer to a devoted follower or **assistant of a prominent figure**. An acolyte is someone who **supports and learns from a more experienced person**, sometimes in political, academic, or professional environments.

AI and Machine learning is a **support to separation scientist**, but it needs to learn from **high quality information**.

ChatGPT ▾

Define AI in on sentence?

Define AI in on sentence?

Artificial Intelligence (AI) is the simulation of human intelligence processes by computer systems, enabling them to perform tasks that typically require human cognition, such as learning, reasoning, problem-solving, and understanding language.

Method optimization

Data processing

GPT: Generative Pre-trained Transformer

Generative: *The model is generating information*

What we ask

Pre-trained: *The model has been trained on a large amount of data*

The quality of the training

Transformer: *The underlying architecture of neural network model*

The way he manage the information

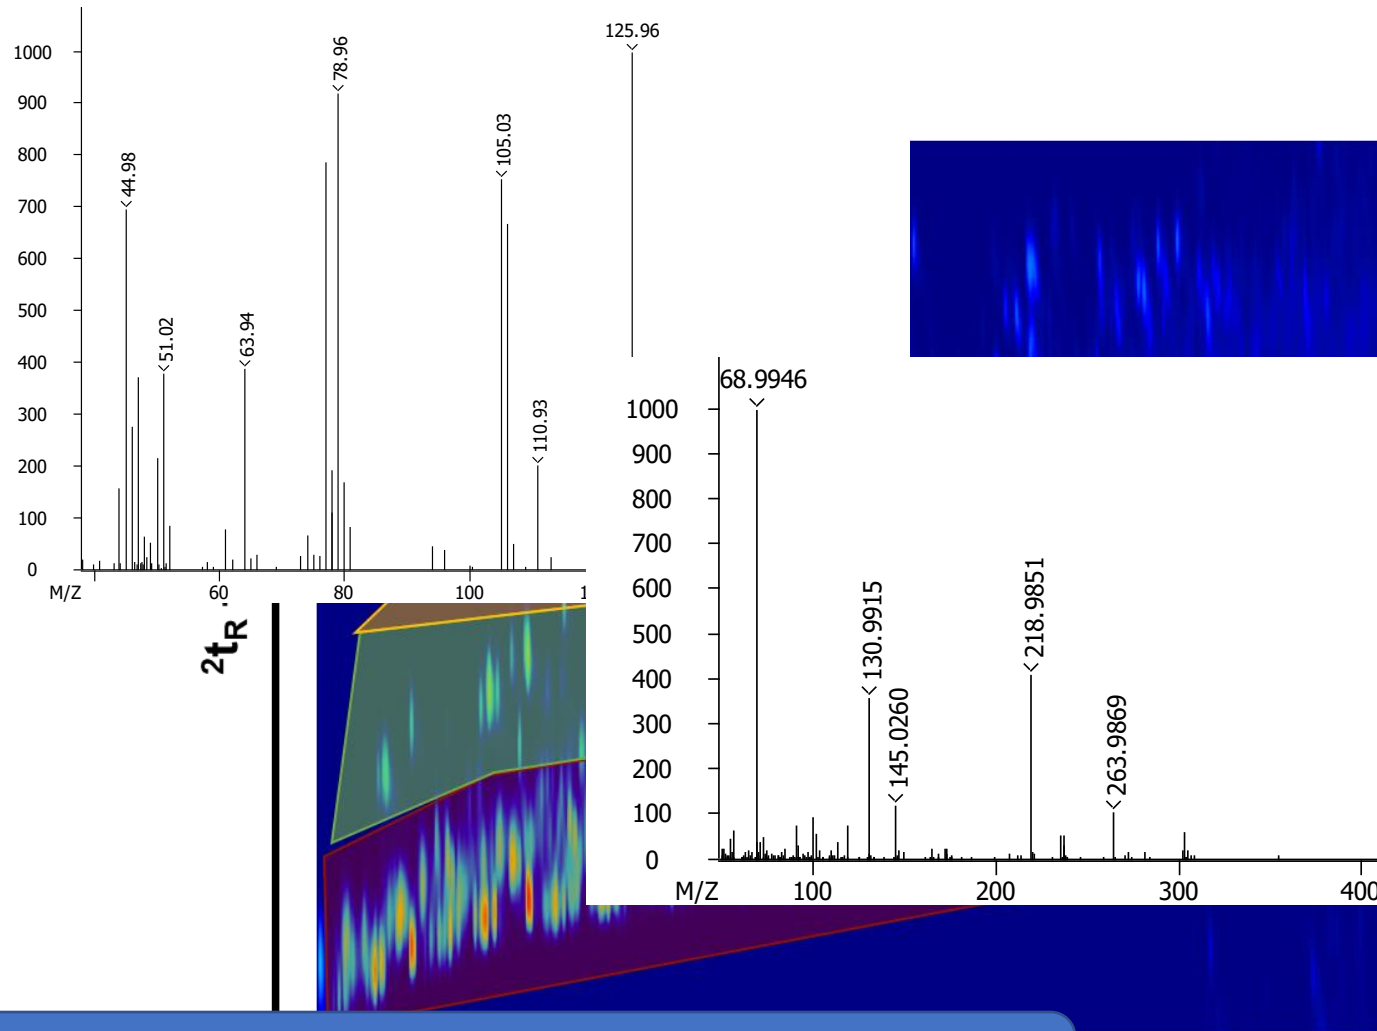

The sample

Abbey

How to handle the method development?

How to manage the data processing?

- 50 min

Robust multi-factor ID:

- EI fragmentogram - Library match
- HRTOFMS - Exact mass
- GC – Linear retention indices
- GCxGC – Elution pattern

→ Level 2 MSI ID

Pre-trained: generating data as a community

1 – Column classification

- Century mix analysis across **20 Column combinations**

Polarity	Apolar	Mid-Polar	Polar
Apolar			
Mid-Polar			
Polar			

	Normal orthogonality
	Non-orthogonal
	Reversed orthogonality

Normal column combination (Apolar \times Mid-polar)

Reversed column combination (Mid-polar \times Apolar)

1 – System evaluation

- Stationary phase film thickness (0.1 à 1.4 μm)
- Temperature ramp (2 à 15 $^{\circ}\text{C}/\text{min}$)
- Gas type (He, H₂, N₂)
- Gas flow (0.8 à 1.5 mL/min)

2 – Data Collection

Retention time , elution order , geometric peak repartition Etc

+

Boiling points, polarity moment, **SMILES Annotation**

Ciprofloxacin SMILES Annotation
N1CCN(CC1)C(C(F)=C2)=CC(=C2C4=O)N(C3CC3)C=C4C(=O)O

3 – Modelisation-Prediction

Retention indices prediction
(System-independent constants)

Machine Learning Algorithm

Artificial neural network

Transformer: mostly neural network

Define neural network in one sentence

Deep Learning, a step further for transformers

Machine Learning

Possible to train with fewer data

Statistical algorithms

Structured data

Limited tuning capabilities

Simpler applications

Deep Learning

Large datasets for training

Artificial Neural Networks (ANN)

Unstructured data

Can be tuned in multiple ways

More complex applications

Automation

New methods

Greener methods
